NATIONAL SEMINAR

on

**Sustainable
Development and
Disaster
Management: Issues
and Challenges in India**

8-9 2021

March 2021

Organised By

Department of Lifelong Learning
University of Rajasthan, Jaipur

About the University

University of Rajasthan, situated in the heart of the Pink City Jaipur, was established in 1947 as a multi faculty University. UGC has awarded the University with "A" Grade and recognized the University amongst the top 10 Indian Universities with Potential for Excellence (UPE) in 2012. It is the oldest University of Rajasthan and its main objective has been the creation and dissemination of knowledge. It caters to the aspiration for higher education of students from Rajasthan and other parts of the country. The University offers UG, PG, M. Phil and Ph.D. programs in various disciplines at 37 Departments, 22 Research Centres and 6 Constituent Colleges. The University believes that in its journey of 69 years it has brought about a transformation in Higher Education in Rajasthan and the country at large. University of Rajasthan is dedicatedly working to effectively promote lifelong learning since decades. Its mission is creation and strengthening of infrastructure for global competence. It also establish expansion of academic links and research collaborations with national and international institutions. The University provides research facilities supported through UGC-SAP, UPE, DST-FIST, PURSE, DST-SAIF program grants. Backed up with good infrastructure, the University is an active hub of academic and research activities.

About the Department

With the purported aim of expanding the frontiers of knowledge and extending the institutional resources to the community DLL conducts short term training courses, workshops, seminars, summer schools, capacity building and skill development programme's etc. throughout the year. The department organizes programme's which are need based, flexible, catering to the diverse needs of small and large segments of people. DLL has been successful in reaching out to large sections of society, especially the marginalized and disadvantaged, through varied interventions and capacity enhancement endeavours. It has been instrumental in conducting sensitization and awareness programmes regarding universal literacy, gender and justice. HIV/AIDS, environment conservation, learning, sanitation, entrepreneurship development etc. Special thrust remains on capacity building, leadership skills, personality development, stress management, career counselling and guidance programme for youth. DLL also develops teaching learning, instructional, training and promotional material as part of providing academic/technical support to different programmes. DLL is engaged in conducting English language teaching classes in rural areas, government schools and urban slums for senior citizens and deprived sections of society.

Collaboration and support for various activities and programmes are solicited from university departments, colleges, NGOs, and resource centres of National Literacy Mission Authority.

About The Seminar

Sustainable Development and Disaster Management have become key points in policy circles. In this always growing world, developed countries are raising their parameters day by day and developing countries are continuously striving hard to reach developed world's level of growth. In this growth competition which is adversely affecting environment and ecology world is urgently feeling the need for sustainable development. From Rio Summit of 1992 world has travelled a long journey so far so that any growth or development which fails to pass the litmus test of sustainability is not appreciated in any part of the world. Sustainable Development is the slogan in policy circles across the globe encompassing different sectors of the society- political, social, economic, environmental and cultural. While the demand for sustainable development has gained a ground across globe, the strategy and action plan for the same needs a further push to harvest any fruitful results. While the world was busy finding appropriate strategy for sustainable development, year 2020 added special focus one yet another important aspect of sustainable development i. e. Disaster Management. Disasters, both- natural and man-made, not only halt but also wipe away the development achieved so far. Hence they need to be tackled in such a way that they can be anticipated, managed and prevented in a sustainable way. We need to integrate both sustainable development and disaster management together and find appropriate solution to the challenge posed to humankind. India being the emerging power on global map, largest democracy and second most populous country of the world has great responsibility to take care of these two dimensions in its vision and mission. We need to know the efforts of government, civil society and private sector for the same so as to understand the gaps and give timely intervention. This seminar underlines the relationship, impact and importance of these two for a better future for ourselves and our future generations with special reference to India.

Sub Themes of the seminar

1. Sustainable Development: Conceptual Framework
2. Challenges before Sustainable Development
3. The Division and Unity of the world on Sustainable Development

4. Climate Change and Sustainable Development
